APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit to change the point of diversion and place of use of a portion of the waters of an underground source as heretofore granted under Permit 30191, Certificate 9245, is issued subject to the terms and conditions imposed in said Permit 30191, Certificate 9245, and with the understanding that no other rights on the source will be affected by the change proposed herein. The well shall be equipped with a 2-inch opening and a totalizing meter must be installed and maintained in the discharge pipeline near the point of diversion and accurate measurements must be kept of water placed to beneficial use. The totalizing meter must be installed before any use of the water begins or before the proof of completion of work is filed. If the well is flowing, a valve must be installed and maintained to prevent waste. This source is located within an area designated by the State Engineer pursuant to NRS 534.030. The State retains the right to regulate the use of the water herein granted at any and all times.

This permit does not extend the permittee the right of ingress and egress on public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from State, Federal and local agencies.

The total combined duty of water under Permit 68007, and any water of the Walker River Decree and any storage water appurtenant to the place of use shall not exceed 52.85 acre-feet per year for the irrigation of 13.22 acres. The permit holder is responsible for insuring delivery of the entitled decreed and storage waters that are supplemental to this permit. In any year the Walker River Irrigation District declares a full allocation of decreed water to the priority years of C-125 decree claims supplemental to this permit, underground water shall not be pumped from the well described in this permit. In any year the Walker River Irrigation District has no decreed or storage water, or declares a reduced allocation of surface waters to the priority years of C-125 decree claims supplemental to this permit, then water can be pumped from the well for irrigation of the permitted place of use. Irrigation shall not exceed a duty of four acre-feet per year from the total of decreed, storage, and underground waters.

(CONTINUED ON PAGE 3)

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 0.073 cubic feet per second, but not to exceed 52.85 acre-feet annually, and not to exceed an annual duty of 4.0 acre-feet per acre of land irrigated from any and/or all sources.

Work must be prosecuted with reasonable diligence and be completed on or before:

February 1, 2003

Proof of completion of work shall be filed before:

March 1, 2003

Water must be placed to beneficial use on or before:

February 1, 2007

Proof of the application of water to beneficial use shall be filed on or before:

March 1, 2007

Map in support of proof of beneficial use shall be filed on or before:

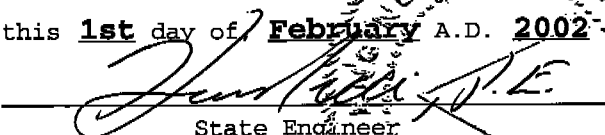

March 1, 2007

## Item 15 – Remarks

Use maps on file at the Division of Water Resources under Application 65724 to support the proposed point of diversion, under Application 66303 to support the proposed place of use, and Proof of Beneficial Use map on file under Permit 30191 to support the existing point of diversion.

The acreage being removed from irrigation under this application is not supplemental to any other groundwater right.

The applicant is leasing the land within the place of use. The water under this application is not to be supplemental to water under Permits 66303 and Temporary Permit 66891T. If this application is approved prior to 11/16/01, when the temporary permit expires, the amount of water under 66891T will be reduced by 52.88 AFA for the irrigation of 13.22 acres.
